SUMMARY

Data analytics and operations professional graduating May 2026 with hands-on experience in reporting, process improvement, stakeholder communication, and cross-functional data analysis. Currently supporting a healthcare startup as a Part-Time Operational Data Analytics Analyst building dashboards used daily by leadership, surfacing fulfillment trends that drove operational decisions, and shipping AI automation tools that save the team 70 minutes every day. Proficient in Excel, SQL, Mixpanel, Metabase, Airtable, HubSpot, and Google Sheets. Proven ability to translate raw data into clear, actionable insights for non-technical audiences.

EDUCATION

Appalachian State University, Boone, NC

Graduation: May 2026

Bachelor of Science — Computer Information Systems (CIS), Cybersecurity Concentration | Major GPA: 3.67

SKILLS

Data & Analytics: Microsoft Excel (Advanced), SQL, MySQL, Google Sheets, Tableau, Mixpanel, Metabase

Business & Operations Tools: Airtable, HubSpot, Dropbox, Microsoft Office Suite, Google Workspace, Microsoft Word, Microsoft PowerPoint

Core Competencies: Process Improvement, Operations Reporting, Data Visualization, Stakeholder Communication, Cross-functional Collaboration, SOP Development

WORK EXPERIENCE

Willow Health Services Inc.

Remote | May 2026 – Present

Operational Data Analytics Analyst — Part-Time

- Continued in an expanded part-time capacity following internship, maintaining ownership of reporting infrastructure, dashboards, and automation tools built during initial tenure.
- Sustained daily operational reporting across stakeholder teams, ensuring consistent data visibility for leadership decision-making.

Willow Health Services Inc.

Remote | January 2026 – May 2026

Operational Data Analytics Intern

- Identified and eliminated a fully manual daily tracking workflow, designing an automation solution that saved the operations team 45 minutes per day and reduced human error.
- Built an automated order status reporting tool that processes weekly Excel shipping reports across multiple cohorts, auto-generating a formatted summary with delivery rates and percentages — eliminating manual data filtering and saving 25 minutes per day.
- Analyzed fulfillment data across Mixpanel and Metabase, surfacing shipping trends that directly informed the escalation of 500+ delayed packages and improved operational visibility across the team.
- Owned 3+ recurring stakeholder reports weekly, consolidating data from multiple sources into dashboards and Google Sheets reports adopted by the team for daily decision-making.
- Built a daily cohort report visualizing order status trends and performance percentages over time, presented to operations and leadership to support consistent data-driven oversight.
- Maintained a daily cancelled order tracking report consolidating data from Airtable and Willow Admin, surfacing exceptions and enabling faster cross-team issue resolution.
- Standardized and organized 50+ marketing assets monthly across Airtable and Dropbox, improving naming conventions and routing efficiency across the team.

Starbucks, Winston-Salem, NC

Dec 2022 – May 2026

Barista

- Delivered consistent customer service in a high-volume environment and trained new team members on drink preparation and POS system usage.

PROJECTS

Shipping Operations Dashboard — Tableau Data Visualization public.tableau.com

- Built a 4-chart interactive Tableau dashboard analyzing shipping performance across 8 weeks, 3 carriers, and 3 product categories.
- Visualized weekly order volume trends, carrier delay rates, on-time performance by product type, and a heat map identifying the highest-risk carrier and category combinations.

Viglore — Market Intelligence Platform viglore.com

- Independently designed and launched a live market intelligence platform aggregating real-time sentiment analysis, financial news, and market data across 22 companies for end-user decision-making.
- Built a city-based ranking and scoring system covering 90+ markets with dynamic filtering and data visualization, translating complex datasets into an accessible, actionable interface.
- Managed the full product lifecycle from requirements and design through deployment and ongoing maintenance.

Market Sentiment SQL — Data Analytics Project github.com/nevafrazier/market-sentiment-sql

- Designed a structured analytics project tracking stock performance, sentiment trends, and news coverage across 22 companies and 2,600+ rows of time series data.
- Produced 12 business-driven analytical reports measuring volatility, performance trends, and composite weighted scoring across 25 markets to generate actionable insights.

Neva's Agent — Personal AI Assistant github.com/nevafrazier/personal-agent

- Designed and deployed a personal AI assistant capable of automating research, drafting communications, and completing multi-step tasks with minimal manual input.
- Built to retain context across sessions, reducing repetitive setup and enabling faster, more consistent task execution over time.

nevafrazier.com — Personal Portfolio nevafrazier.com

- Designed and launched a personal portfolio site showcasing live projects, deployed with a custom domain.

CERTIFICATIONS & COURSES

- Microsoft Excel Advanced Badge — Cengage, 2024
- Mixpanel Partner Fundamentals Certification, 2026
- Google AI Essentials Certificate, 2025
- Google Cybersecurity Certificate, 2025
- Inbound Marketing — HubSpot Academy, 2024
