SUMMARY

Technology product analyst and May 2026 graduate with hands-on experience in digital product development, requirements gathering, KPI monitoring, and cross-functional delivery. Currently supporting a healthcare startup as a Product Analyst owning reporting tools used daily by leadership, defining product requirements, and shipping AI automation that saves the team 70 minutes per day. Independently designed and launched Viglore, a live financial market intelligence platform, managing the full product lifecycle from requirements through deployment and ongoing maintenance. Familiar with SDLC principles and agile delivery; proven ability to translate technically complex concepts into clear, business-friendly language for non-technical stakeholders.

EDUCATION

Appalachian State University, Boone, NC

Graduated: May 2026

Bachelor of Science — Computer Information Systems (CIS), Cybersecurity Concentration | Major GPA: 3.67

SKILLS

Data & Analytics: Microsoft Excel (Advanced), SQL, MySQL, Google Sheets, Tableau, Mixpanel, Metabase

Business & Operations Tools: Jira, Airtable, HubSpot, Dropbox, Microsoft Office Suite, Google Workspace, Microsoft Word, Microsoft PowerPoint

Core Competencies: Agile Methodology, SDLC, Requirements Gathering, Product Documentation, KPI & SLA Monitoring, Digital Product Development, Issue Tracking & Remediation, Process Improvement, Stakeholder Communication, Cross-functional Collaboration

WORK EXPERIENCE

Willow Health Services Inc.

Remote | May 2026 – Present

Operational Data Analytics Analyst — Part-Time

- Maintained ownership of product reporting tools, dashboards, and automation solutions, ensuring consistent performance and data accuracy for leadership decision-making.
- Monitored operational KPIs and SLAs across stakeholder teams, surfacing performance gaps and partnering with cross-functional teams on issue identification and remediation.

Willow Health Services Inc.

Remote | January 2026 – May 2026

Operational Data Analytics Intern

- Gathered requirements from operations stakeholders, defined solution scope, and shipped an automation tool that eliminated a fully manual daily tracking workflow — saving 45 minutes per day and reducing human error.
- Defined product requirements and built an automated order status reporting tool processing weekly Excel reports across multiple cohorts, auto-generating formatted summaries with delivery rates and percentages — eliminating manual filtering and saving 25 minutes per day.
- Monitored fulfillment KPIs across Mixpanel and Metabase, tracking SLA performance and surfacing shipping trends that directly informed the escalation of 500+ delayed packages and improved operational visibility across the team.
- Owned 3+ recurring stakeholder reports weekly, translating raw data from multiple sources into dashboards and reports adopted as daily decision-making tools by operations and leadership.

- Built and delivered a daily cohort report visualizing order status trends and performance percentages over time; presented findings to operations and leadership to drive data-informed product decisions.
- Maintained issue-tracking documentation for cancelled orders, consolidating data from Airtable and Willow Admin to surface exceptions and enable faster cross-team remediation.

Starbucks, Winston-Salem, NC

Dec 2022 – May 2026

Barista

PROJECTS

Viglore — Financial Market Intelligence Platform viglore.com

- Acted as sole product owner — defined product requirements, wrote functional specifications, and managed the full product lifecycle from ideation through deployment and ongoing maintenance.
- Built a live financial market intelligence platform aggregating real-time sentiment analysis, news, and market data across 22 companies to support end-user investment decision-making.
- Designed and iterated on product features including a city-based ranking and scoring system covering 90+ markets; translated complex financial datasets into an accessible, actionable interface informed by competitive research.
- Monitored platform KPIs and performance post-launch, prioritizing feature enhancements and issue fixes based on data-driven insights.

Shipping Operations Dashboard — Tableau Data Visualization public.tableau.com

- Built a 4-chart interactive Tableau dashboard analyzing shipping performance across 8 weeks, 3 carriers, and 3 product categories.
- Visualized weekly order volume trends, carrier delay rates, on-time performance by product type, and a heat map identifying highest-risk carrier and category combinations.

Market Sentiment SQL — Data Analytics Project github.com/nevafrazier/market-sentiment-sql

- Designed a structured analytics project tracking stock performance, sentiment trends, and news coverage across 22 companies and 2,600+ rows of time series data.
- Produced 12 business-driven analytical reports measuring volatility, performance trends, and composite weighted scoring across 25 markets to generate actionable insights.

CERTIFICATIONS & COURSES

- Microsoft Excel Advanced Badge — Cengage, 2024
- Mixpanel Partner Fundamentals Certification, 2026
- Google AI Essentials Certificate, 2025
- Google Cybersecurity Certificate, 2025
- Inbound Marketing — HubSpot Academy, 2024
