SUMMARY

AI-native developer and CIS graduate specializing in agentic workflows, LLM integration, and AI-powered automation. Hands-on experience building and deploying production AI agents using Claude API, OpenAI, Groq, Python, and FastAPI. Currently shipping real AI solutions at a healthcare-adjacent startup — automating manual processes, surfacing data insights, and integrating LLMs into operational workflows. Fluent in full-stack development, prompt engineering, RAG, and end-to-end deployment.

EDUCATION

Appalachian State University, Boone, NC

Graduation: May 2026

Bachelor of Science — Computer Information Systems (CIS), Cybersecurity Track | Major GPA: 3.67

TECHNICAL SKILLS

AI & Agentic Development: Claude API, OpenAI, Groq, Gemini, LLM Integration, Prompt Engineering, RAG, Agentic Workflows, Multi-Agent Orchestration, NLP, Sentiment Analysis, AI Automation

Programming & Software: Python, JavaScript, SQL, MySQL, React, HTML/CSS, Microsoft Excel (Advanced)

Tools & Platforms: FastAPI, Vercel, Railway, Google Cloud, REST APIs, Tableau, Mixpanel, Metabase, Airtable, HubSpot

Networking & IT: Wireshark, Cisco Packet Tracer, Linux, Cybersecurity Fundamentals

PROJECTS

Viglore — AI-Powered Market Intelligence Platform

viglore.com | Python · FastAPI · React · NLP · Railway · Vercel

- Built and deployed a full-stack AI market intelligence platform with a real-time NLP sentiment analysis pipeline, financial news aggregation, Stocktwits integration, and live stock data.
- Engineered an AI-driven city-based market ranking system scoring 90+ cities using composite weighted sentiment and financial signals, served via a React frontend with dynamic filtering.
- Architected a FastAPI backend with a full AI data pipeline deployed on Railway and a React/Vite frontend on Vercel, managing the complete deployment independently.

Market Sentiment SQL — Data Analytics Project

github.com/nevafrazier/market-sentiment-sql | MySQL · SQL · Window Functions · CTEs

- Built a SQL analytics project tracking stock prices, VADER-style sentiment scores, and news coverage across 22 companies and 2,600+ rows of time series data.
- Wrote 12 business-driven queries using window functions (RANK, LAG, NTILE, rolling averages), multi-CTE chains, STDDEV volatility analysis, and composite weighted scoring across 25 tech cities.

Neva's Agent — Personal AI Assistant

github.com/nevafrazier/personal-agent | Python · FastAPI · React · Claude API · Playwright · SSE

- Built a full-stack personal AI agent powered by Claude API with a React frontend and FastAPI backend, streaming responses in real time via Server-Sent Events and running an agentic tool-use loop.
- Integrated browser automation via Playwright enabling the agent to navigate websites, search Amazon and add items to cart, and perform real-world tasks autonomously.
- Engineered persistent cross-session memory, Gmail email composition with preview-before-send, Python code execution, and full Mac filesystem and app control.

nevafrazier.com — Personal Portfolio

nevafrazier.com | React · Vite · Tailwind CSS · Vercel

- Designed and deployed a personal portfolio site featuring live project showcases, built with React, Vite, and Tailwind CSS, deployed on Vercel with custom domain.

WORK EXPERIENCE

Willow Health Services Inc. — Data Analytics Intern

Remote | January 2026 – Present

- Designed and deployed an AI-powered agentic automation system using Python that autonomously retrieves FedEx tracking links, populates shipment statuses, and calculates days-in-transit in Google Sheets — eliminating a fully manual daily workflow and saving 35+ minutes per day.
- Analyzed user and product data across Mixpanel and Metabase, surfacing shipping trends that informed escalation of 500+ delayed packages and improved fulfillment visibility across the operations team.
- Maintained 3+ recurring reports weekly across multiple data sources, building SQL dashboards and Google Sheets reports adopted by the team for daily data-driven decision-making.
- Built a daily cohort report visualizing shipping status trends and performance percentages over time, shared with operations and leadership for consistent visibility into order progress.
- Maintained a daily cancelled order tracking report consolidating data from Airtable and Willow Admin, surfacing order exceptions for faster issue resolution.
- Organized and categorized 50+ marketing assets monthly across Airtable and Dropbox, standardizing naming conventions and routing materials to correct destinations.

Starbucks, Winston-Salem, NC — Barista

Dec 2022 – May 2026

- Delivered consistent customer service in a high-volume environment and trained new team members on drink preparation and POS system usage.

CERTIFICATIONS & COURSES

- Google AI Essentials Certificate, 2025
- Google Cybersecurity Certificate, 2025
- Mixpanel Partner Fundamentals Certification, 2026
- Inbound Marketing — HubSpot Academy, 2024
- Microsoft Excel Advanced Badge — Cengage, 2024
